

List includes the New Idria quake:

All Earthquakes in California-Nevada Map Area

http://earthquake.usgs.gov/earthquakes/recenteqscanv/Quakes/quakes_all.html

Note the sig. after shocks, and New Idria (lately) is now more active than the record holder Parkfield.

Map:

California-Nevada Fault Map centered at 36°N,121°W

<http://earthquake.usgs.gov/earthquakes/recenteqscanv/FaultMaps/121-36.html>

Also,

bc felt it twice.**

** P wave followed by S seconds later, and, therefore, concluded it was big and far away.
Not felt in Santa Barbara, but by the tower clock.

Tower Clock data courtesy of B. Mumford:

Santa Barbara Courthouse Clock
